PORT AGENCY & HUSBANDING SERVICES OFFERED BY CSC

We provide agency for the various vessels, serving at 33 major ports across the east and west coast of India. We proudly serve our Owners as Protective / Husbanding Agents for the following services:

TECHNICAL AND MARINE SERVICES

We offer **on-board repair and overhaul for machineries** of all makes.

- Main Engines
- Generator Engines
- Centrifugal / Gear pumps
- All types of heat Exchangers
- Boilers
- Deck Hydraulic Machinery and Steering Gears
- Electric repairs
- Automation
- Calibration of measuring instruments
- Steel and pipe renewal on deck and in engine room
- Diving services
- Superintendents for Dry Dock and New Construction
- Class approved workshops for life boat and firefighting system servicing

We provide these services in most major Government ports in India. These include:

On the WEST COAST: Kandla, Mumbai, Goa, Mangalore and Cochin

On the EAST COAST: Chennai, Vizag, Krishnapatnam, Haldia and Paradip

Many of the Government Ports have upgraded their shore cargo gear reducing the turnaround time in Indian ports. The above services are hence found to be very beneficial for the ship owners and managers with the growing trend in marine services seen in the recent past.

Our on-board inspection and audit services include

- ISM / MLC / ISPS audits
- Cargo / Mooring / Navigation audits / Pre-vetting

ISM / MLC / ISPS audits are carried out as per the specifications laid by the Company.

We study the Company's manuals and check lists and carry out these audits. The main benefit of these audits is that the auditors are not with any biases about the SMS / Ship staff. Such third party inspections are found to be quite effective. Observations in the mandatory audits are reduced.

Cargo / Mooring / Navigation audits are done so that the vessels are always prepared for the SIRE inspections.

When the vessel is planned for a SIRE / Rightship inspection, Cargo / Mooring / Navigation / Pre-vetting audits play a good role in ship's preparation for the same. Our auditors not only audit but also explain how the Company addresses the requirements led in the VIQ.

The above audits can also be conducted together for optimal costing.
